Another day, another public EV charging station in Tasmania installed by our specialist EV charging team at I Want Energy.
This ABB 24kW DC also has a 22kW AC charger and is located in thylacine country at Maydena in central Tasmania, <https://lnkd.in/gq5b-wTW>
I Want Energy will be rolling out another 20+ public EV chargers across Tassie in the coming months.
Thanks to our partners at [Chargefox](#) and [ABB Product Group Solar](#) and the awesome custom-made stand from Hobart based Kossmann Brothers manufacturing. [#evcharging](#) [#solar](#)

EV INFRASTRUCTURE

RT 50kW

RTM 75kW

PKM 150kW

PK 350kW

OFFICER'S COMMENTS

The survey has identified that there is strong belief that the demand for EV chargers and the use of electric vehicles will grow.

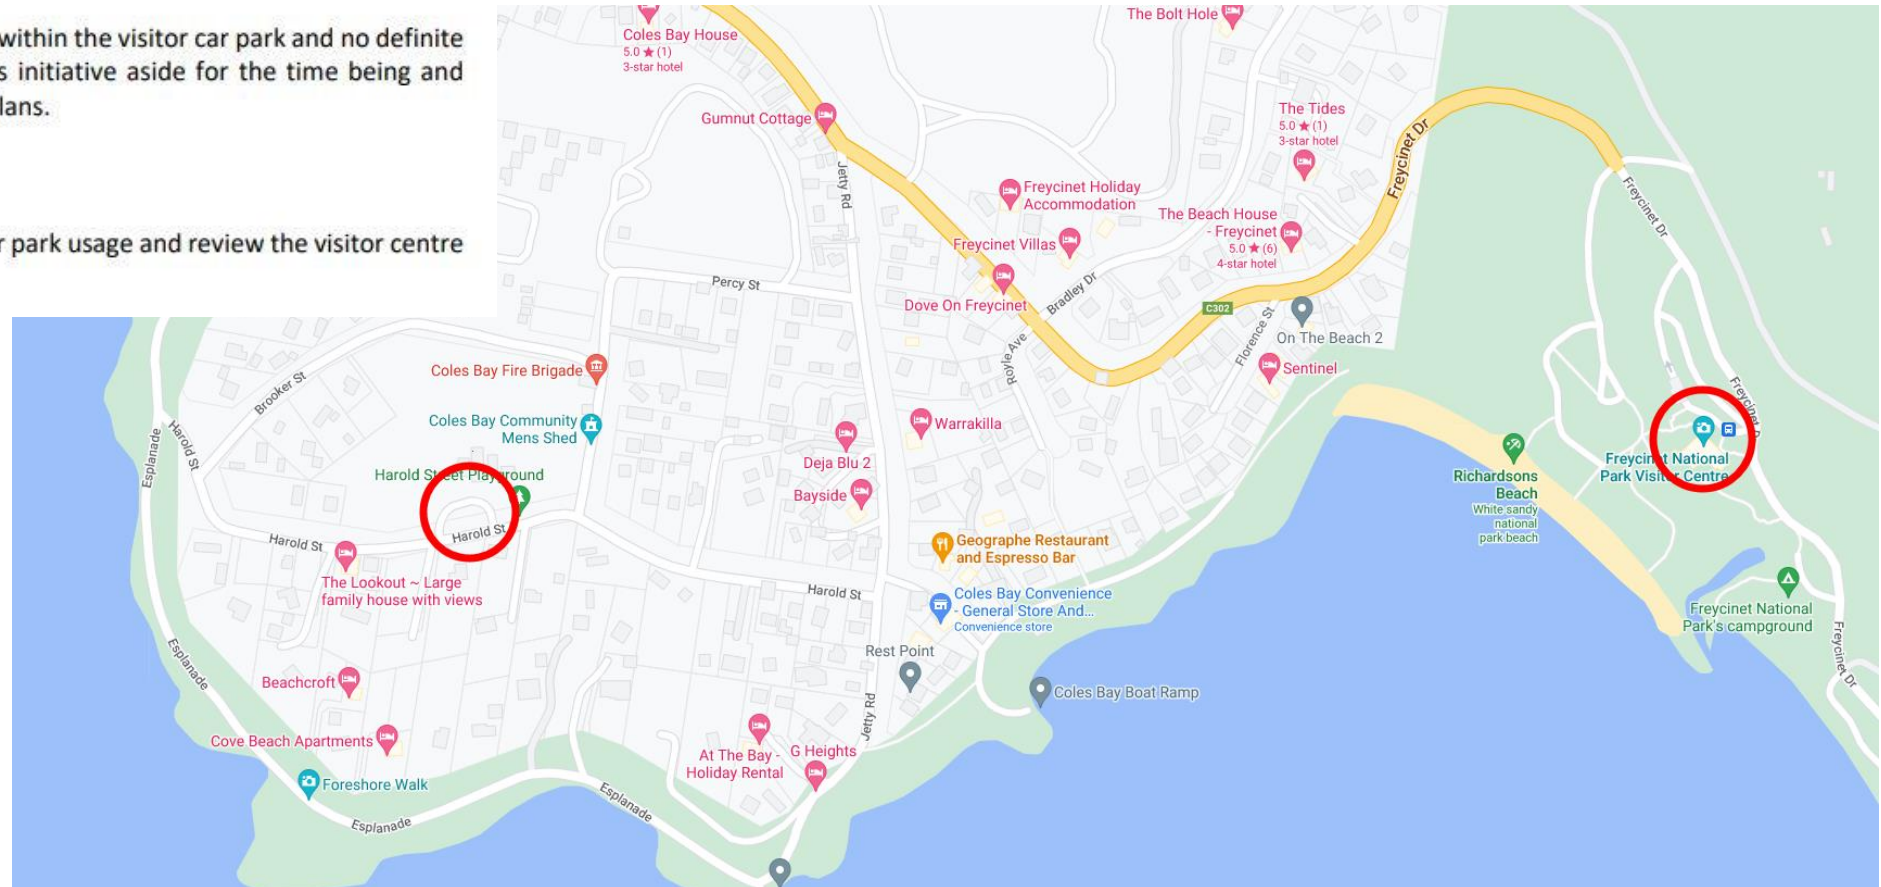

The survey results reflect an almost even level of agreement and disagreement with the proposal. Comments include reference to the visitor carpark development being undertaken by Parks. This project is advancing with planning presently engaging with council and State Growth on traffic movement.

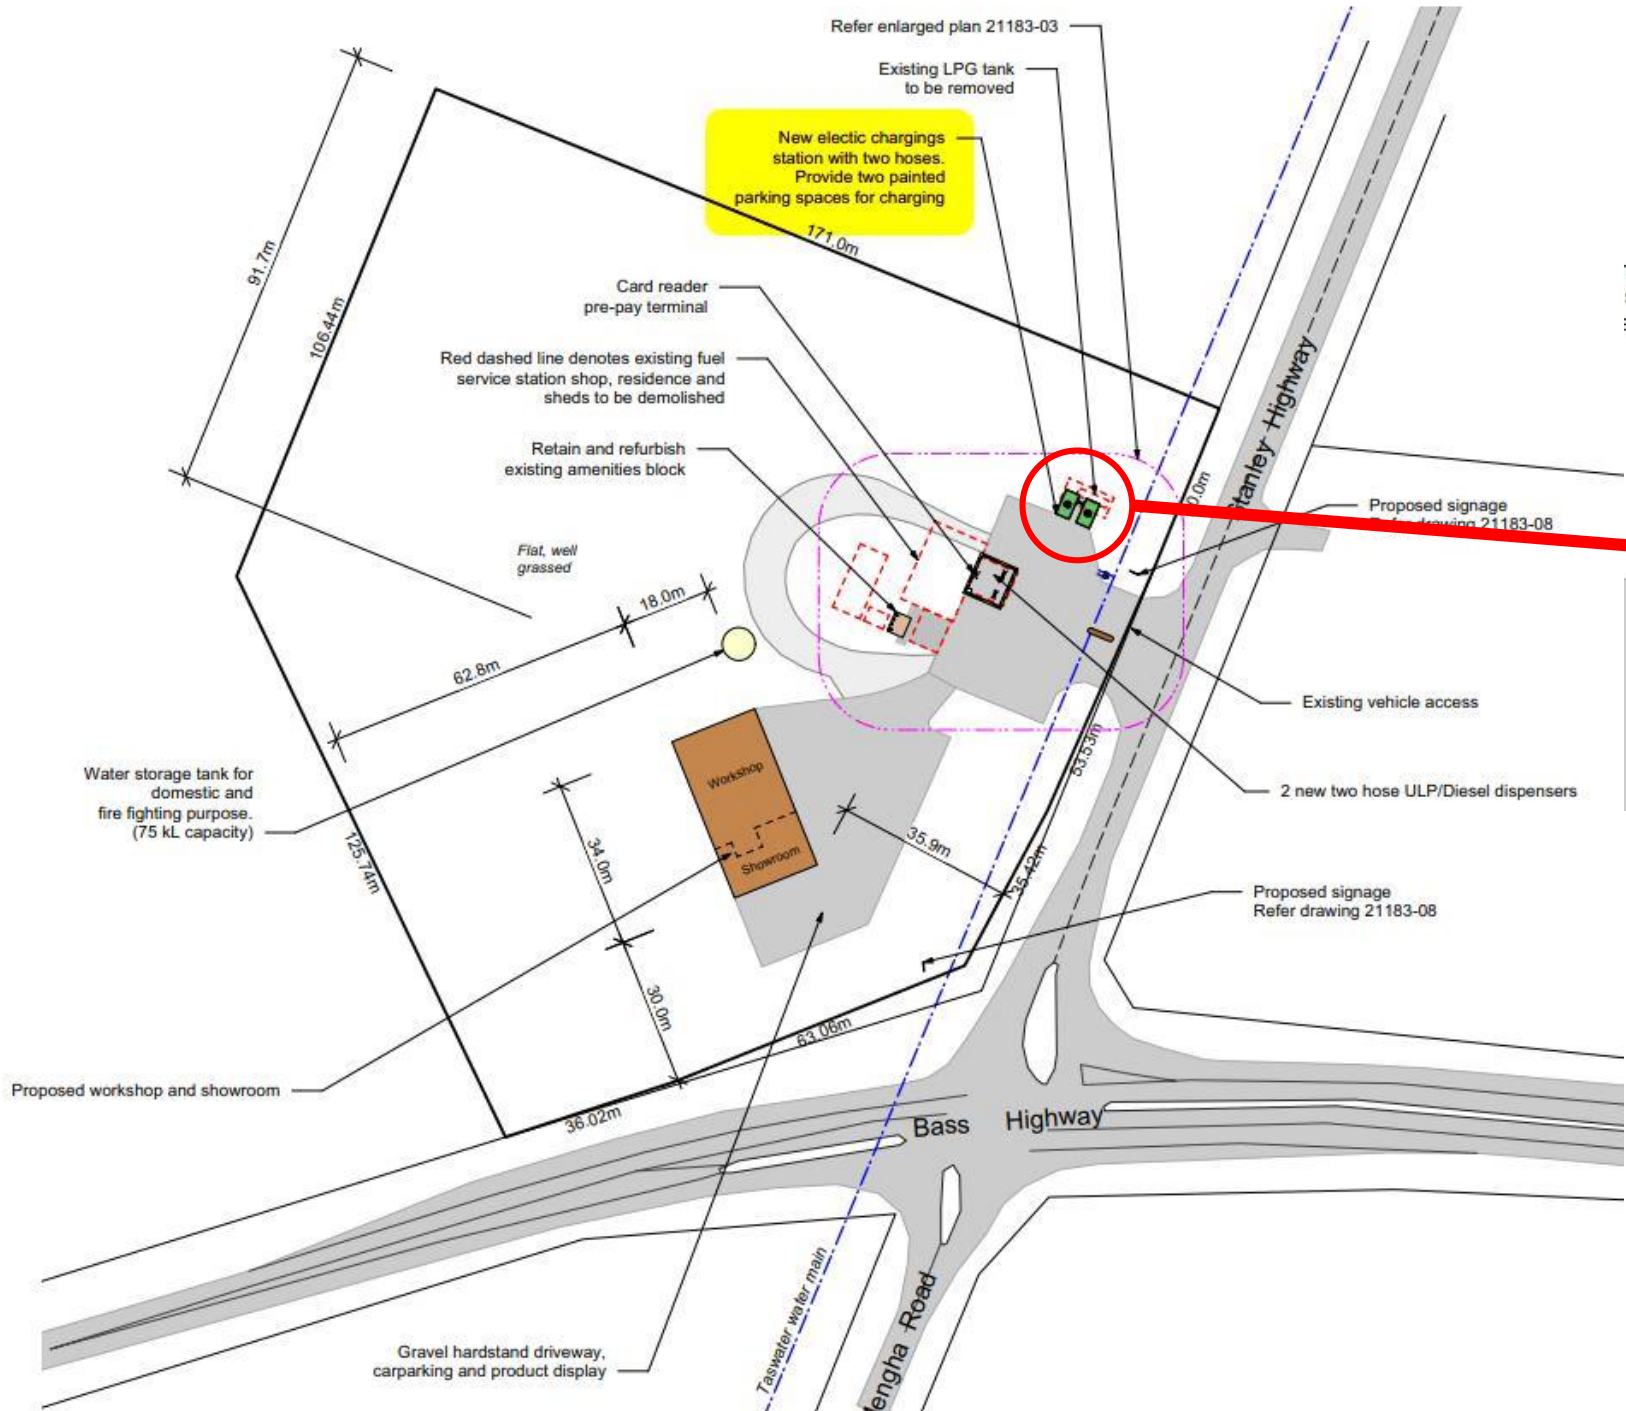

It is understood that Parks are considering the incorporation of EV facilities within their development and decisions relating to this have yet to be resolved.

Given the likelihood of incorporation of EV facilities within the visitor car park and no definite mandate from the survey, it is proposed to sit this initiative aside for the time being and reconsider options after Parks have resolved their plans.

OFFICER'S RECOMMENDATION

That council note the report and monitor the hall car park usage and review the visitor centre plans when approved for construction.

All Successful Applications

-  Tesla Motors Australia, Pty Ltd
-  Ampol Australia Energy Pty Ltd
-  BP Australia PTY LTD
-  NRMA
-  Fast Cities Australia Pty Ltd
-  Zeus Renewables Pty Ltd
