

WHAT WE WANT

We want a decarbonised transport system to help maintain a habitable planet for humankind - and all other living species.

We accept science-based targets. The science clearly states that to confront the urgency of the climate crisis, Australia needs to cut emissions by at least 75% by 2030, and reach net zero by no later than 2035.

WHY JOIN US?

Join AEVA to share the benefits from:

- Keeping up to date with the latest breaking EV news and innovations
- Access to specialised knowledge from EV conversions and inspiration for DIY projects
- Being part of a tipping point and inevitable transition to electric drive
- Learning from and sharing real-world experiences with EV drivers and others in the EV field
- A diverse and inclusive like-minded-community
- Financial discounts or special offers on selected EV events, and
- Opportunities to influence policy and collaborate with other EV enthusiasts

VICTORIA BRANCH

WHO WE ARE

The Australian Electric Vehicle Association (AEVA) Ltd. is a volunteer run, not-for-profit organisation dedicated to the cause of switching Australia's transport networks to electric drive as quickly as possible.

We represent all EV users and enthusiasts and all share a common interest in Electric Vehicles (EVs) and EV technology.

Formed after the oil price shocks of 1973, the AEVA is the **longest continuously running EV society in the world.**

After almost 50 years operating as an Incorporated association, in July 2022, the AEVA became a public Company Limited by Guarantee to better reflect the national role we play in advancing electromobility.

WHAT WE STAND FOR

AEVA stands for electrification of all forms of powered transport – private passenger vehicles (cars, bikes, scooters), as well as public buses, trains, fleets, trucks, water craft, aircraft and more – and their associated accessories and infrastructure.

We strive to behave in a professional, truthful and kind manner. We are guided by a commitment to fairness, equity and accessibility for all.

WHY WE ARE UNIQUE

The EV landscape is rapidly changing and there are many moving parts in this evolving ecosystem.

What makes us different and unique is our independent, real-world experience as daily users of EVs.

We value non-political, non-commercial, unbiased personal interactions and learning. We want what's best for everyone, not just the company selling the EV, accessory or infrastructure.

This puts us in the unique and niche position to provide value without vested interests .

WHAT WE DO

We do as much as we can to help electrify transport and promote EVs. This means we:

- Create greater awareness of EVs, overcome misinformation, advocate for and encourage EV use
- Provide a forum for social and technical education in the EV field
- Represent all EV users, converters and enthusiasts
- Advocate and make submissions to State and Federal governments and industry bodies about policies which will help transition to electric drive
- Collaborate with like-minded groups in the EV ecosystem

HOW WE DO IT

We help electrify transport and promote EVs through providing:

- Public education
- Peer-to peer support
- Policy recommendations
- Partnership opportunities
