AEVA awards best charging station in Australia

The Australian Electric Vehicle Association (AEVA) announced today the winner of its 2025 Charging Station of the Year award at its annual conference in Melbourne. Now in its second year, the award recognises reliable, convenient, well kept and thoughtfully designed public EV charging stations. The award aims to showcase the high quality charging infrastructure that EV users appreciate and want more of. Nominations are made by AEVA members.

The winner of AEVA's Best Charging Station for 2025 is the [Tesla supercharger](#) station at New Italy, NSW. This station is open to all EV models, offers a very high level of amenity for EV users, and is complete with:

- A large solar array which shades the 12 charging bays;
- Bright lighting and pleasant surrounds including shady areas and picnic tables;
- Close proximity to a cafe, toilets and a gift shop; and
- Pull-through parking for EVs towing trailers and a tap-and-go credit card payment option.

Runner-up was awarded to the [crowd-funded fast charging station](#) in Lake Grace, WA, which was installed in 2020 to help link Perth and Esperance.

"AEVA congratulates Tesla and the NSW Government for incorporating all the key elements EV drivers want in a charging station" said Dr Chris Jones, AEVA national president. "This award shows the public and industry what EV drivers appreciate in a high quality charging station".

About AEVA

The Australian Electric Vehicle Association (AEVA) LTD is a volunteer-run, not-for-profit organisation dedicated to the cause of switching Australia's transport networks to electric drive as quickly as possible. Formed after the oil price shocks of 1973, the AEVA is the longest continuously running EV society in the world. We represent all EV users and enthusiasts; current and prospective.
